

RIPSTOP

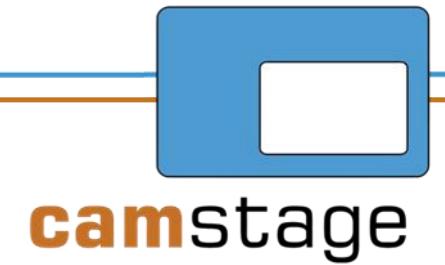

WARNING:

The patterns shown give an indication of colour. However a slight variation must be expected between dye batches, and monitors. All flame retardant materials should be kept free of dust as this may provide a fire source. Goods are offered subject to our Terms & Conditions of trading, a copy of which is available on request. We highly recommend viewing fabric samples before placing an order or manufacture.

RIPSTOP

Perfect for • Decorative/Scenic • Film & TV • Stage

A lightweight FR Ripstop designed for use in the manufacture of inflatables and large shaped structures where load weight is an issue. White 280cm wide Ripstop can be projected onto producing a fantastic image quality and conforms to M1 regulations.

Please note: This fabric is only available in full rolls.

Due to the semi metallic finishes on the silver (RS017) and Gold (RS018) fabrics; please note that these colours are applied to a black backing; making the colour single sided.
