PRINCE RECLINER

LUXURY CINEMA SEATING

Our state of the art recliner chairs offer dual motor technology which allows separate seat/footrest and backrest adjustment, allowing users to find the optimum viewing position and comfort. The headrest self-adjusts inside the frame as the chair is reclined, this gives complete support at the optimum viewing angle.

Prince Recliner

The recliner range is equipped with a foldaway footrest to enable easy cleaning without having to install an independent cleaning system. And the 'Plug' and 'Play' system which conceals all wiring in the arm cavity to keep your cinema looking sleek and smart!

The recliner chairs are made of the highest quality components including a solid beech hardwood frame, with industry leading steel sprung inner core. The modular design allows for maximum number of chairs per row and the overall envelope of the chair can be adjusted to suit any row depth.

We have a wide range of colours and materials available, including fabrics, velvets, leathers and faux leathers
